

Subject: HOA_1
Condition: hip osteoarthritis
Clinical deficit: Right
QC: Passed

1. Temporal Gait Analysis

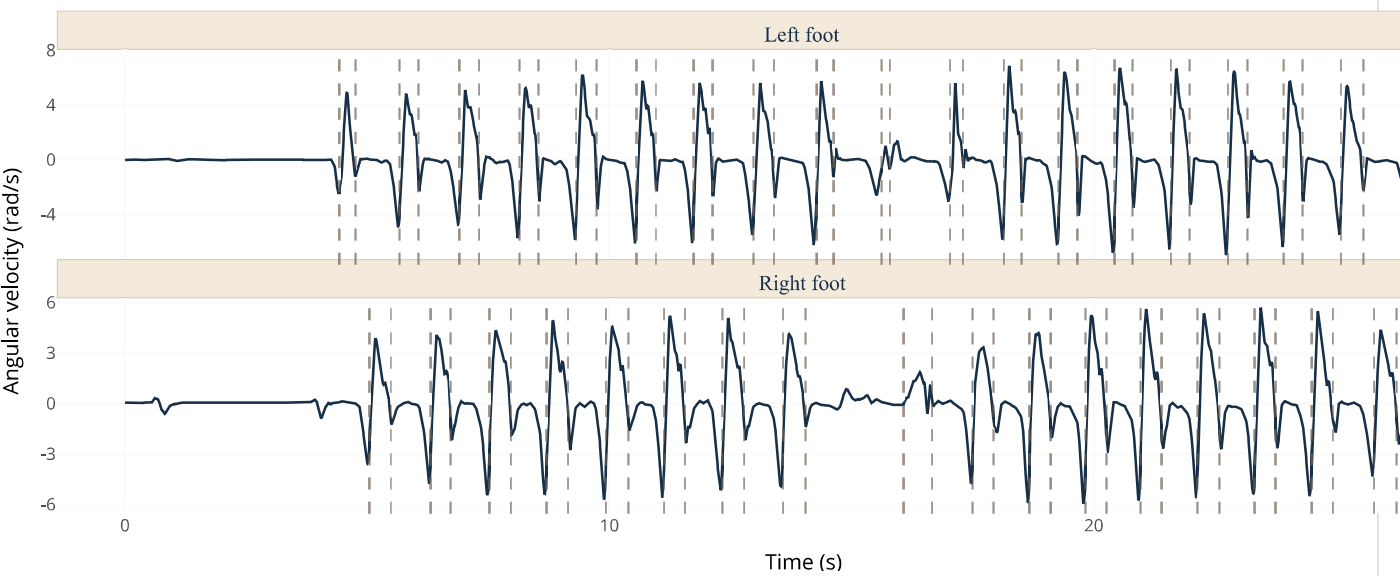

MEASURE	LEFT	RIGHT	ASYMMETRY
Stride duration	1.217 s	1.205 s	1.00%
Swing duration	0.387 s	0.442 s	13.30%
Stance duration	0.821 s	0.765 s	7.10%

2. Gait Variability & Consistency

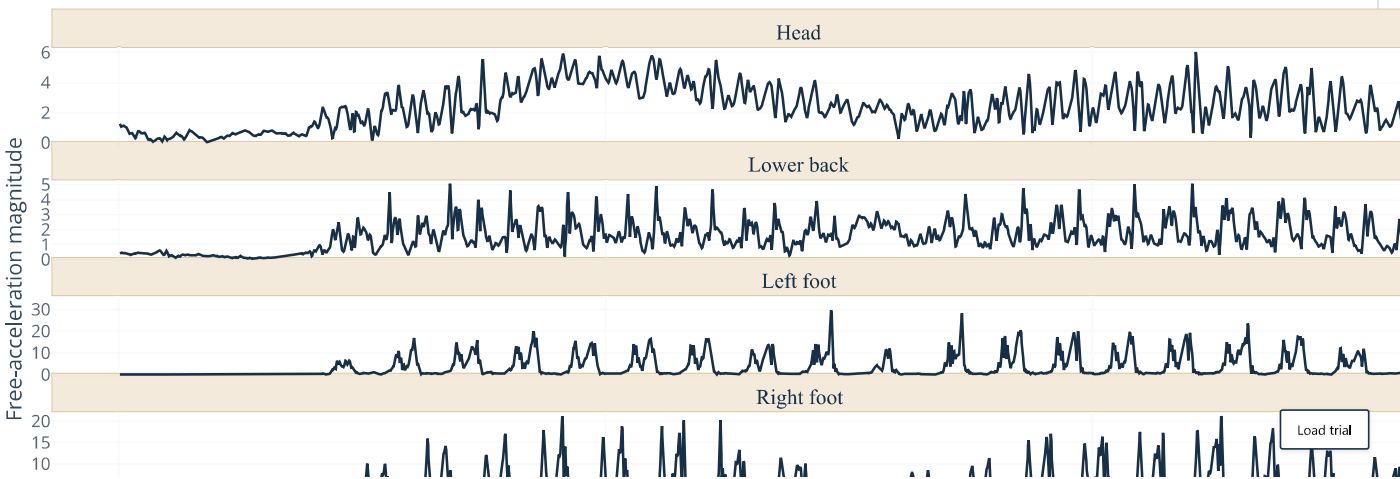

MEASURE	LEFT	RIGHT
Stride variability (CV)	6.77%	3.51%
Swing variability (CV)	10.60%	2.79%
Stance variability (CV)	8.67%	5.62%
Analyzed complete strides	12	11

CV = standard deviation / mean × 100. Lower values indicate more consistent cycle timing within this trial; these are descriptive measures, not diagnostic thresholds.

3. Bilateral Gait Events

4. Segmental IMU Motion

5. Cycle-Level Data

SIDE	WALKING PHASE	CYCLE	EVENT	SWING START	SWING END
Left	Straight — Back	1	13	1927	1967
Left	Straight — Back	2	14	2042	2080
Left	Straight — Back	3	15	2159	2198
Left	Straight — Back	4	16	2277	2317
Left	Straight — Back	5	17	2392	2431
Left	Straight — Back	6	18	2510	2556
Left	Straight — Back	7	19	2655	2683
Right	Straight — Back	1	12	1982	2025
Right	Straight — Back	2	13	2096	2140
Right	Straight — Back	3	14	2215	2260
Right	Straight — Back	4	15	2332	2375
Right	Straight — Back	5	16	2450	2494
